ABOUT ME

I am a PhD candidate at Caltech, advised by Yisong Yue. My research focuses on **generative modeling**, in particular **inference-time posterior sampling algorithms with pretrained diffusion priors**, with application to reward-guided generation and scientific inverse problems. More recently, I have been exploring the interplay between generative modeling and representation learning, with a focus on learning better visual tokenizers for generative models.

EDUCATION

California Institute of Technology

September 2023 - Present

Ph.D. student, Computing and Mathematical Science

Tsinghua University, Beijing, China

September 2019 - July 2023

Bachelor of Computer Science, Yao Class, IIIS

GPA: 3.91/4.00

EXPERIENCE

Research Internship at ByteDance Seed video team *June-September 2025*

- Research on end-to-end vision tokenizers for image generation.

Part-time Research Internship at Pika Lab *September 2023-February 2024*

- Research on training diffusion models for guided video generation.

Research Assistant at University of Illinois, Urbana Champaign *October 2021-May 2022*

- Trustworthy machine learning, advised by Prof. Bo Li.

HONORS AND AWARDS

- Kortschak Scholarship 2024
- Scientific Innovation Excellence Award - Tsinghua University 2022
- Sports Excellence Award - Tsinghua University 2019, 2020, 2021
- **2nd** place in the 35th Chinese Physics Olympiad (CPhO) 2018
